Dear Company Hiring Manager,

Re: Please hire me, I wrote a whole 2 paragraphs

If you received my real resume and find yourself here, I encourage you to read this one too. Or, if you're someone like me, feel free to use this resume template (see notes in the README).

I've already spent an hour filling my fake resume with text. I don't plan to write much more for this cover letter. Here comes the lorem ipsum...

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.

Cheers,
Emily Chu

EDUCATION

THE UNIVERSITY OF BRITISH COLUMBIA   Vancouver, BC
Combined Major in Business and Computer Science, 999% average   *Sep 2019 – Present (→ Apr 2024)*

WORK EXPERIENCE

ARBY'S   Canada • Remote
Software developer intern   *May 2021 – Present (→ Dec 2021)*
- Joked with the past intern over Slack about the questionable JavaScript and TypeScript code they wrote
- While upgrading the app through multiple major versions of Angular, managed to bring CPU usage to 100% for extended periods of time (caused by the antivirus scanner going insane). Luckily, due to remote work, I did not have to deal with the machine's noise or heat.
- Enjoyed 3+ poké salads from the Elasticsearch webinars that offered UberEats vouchers
- Woke at 4:30–5:30 each morning in time for 6AM standups in my time zone; went out to enjoy the early sunrise while it lasted.

UBC DEPARTMENT OF COMPUTER SCIENCE   Vancouver, BC • Remote
Leetcode teaching assistant   *Jan 2021 – Jun 2021*
- Taught dozens of students why not to pass a massive 2D array as an argument "by value" in C++
- Navigated past thousands of (identical) stack frames in GDB caused by incorrect base case detection
- Remained nameless on the course Discord until the end of the term, when I linked students to my LaTeX resume template

TECHNICAL PROJECTS

WORKLIST MACHINE   App ⬈ • Code ⬈
Course scheduler designed to "save me time" lol   *Aug 2020 – Present*
- Started this project knowing nothing; picked Node.js, React, and MongoDB mostly because that's what some freecodecamp tutorial used
- Discovered the cons of introducing dependencies such as Bootstrap—on my own time, reinventing the wheel is just a learning exercise
- Due to the exponential-time algorithm, currently working on notifying the user if the input is too large. Solving the halting problem???
- Received 4+ "wow nice" and 2+ "cool can you make it for my school" comments

R.A.N.T. (TOHACKS 2021)   Video ⬈ • Code ⬈
Robot interrogation simulator   *May 2021*
- Came up with a surprisingly usable project name in 30 seconds, marking a 300%+ reduction from past hackathons
- Wrangled the AI into producing relevant questions using Javascript and some convoluted pipeline; laughed at many incorrect outputs
- Worked within the constraints of the Google Cloud Natural Language and OpenAI GPT-3 free API dollars
- Scripted, recorded, and uploaded a demo video starring stock photos in the final 30 minutes of the hackathon

GREENHOUSE PATTERN RECOGNITION (WINHACKS 2021)   App ⬈ . • Code ⬈
Probably unpaid labour, but it's ok it was fun   *Mar 2021*
- Dragged two friends into their first hackathon, hopefully helping them learn Python and Flask
- Won a category by default—all the other teams gave up on this category or something

OTHER EXPERIENCE

SUMMIT LEADERSHIP CASE COMPETITION   Vancouver, BC
Team leader—"The Education Application"   *Jan 2018 – Jun 2018*
- Bombarded mentors with university questions that would usually be answered by an older sibling if I had one
- Still curious about which UBC room we presented in for the semifinals, despite actually attending UBC now
- Sat in office chairs possibly worth more than anything I owned

A NOT-FOR-PROFIT ORGANIZATION   Vancouver, BC
Jack of all trades   *Apr 2017 – Jun 2019*

ACHIEVEMENTS

Certified Decent Grades™ *(Sep 2019 – Apr 2021)*   Award (maybe a scholarship?) named after a very kind family *(Jun 2019)*
An impressive-sounding metal disk in a blue felt box *(Jan 2020)*   Award received during a phone call on the bus *(Jun 2018)*

INTERESTS

Graphic design, going outside, being well-rounded, arguing in favour of the interests section on a resume; they're good to have
